

About us

POWERTEST is one of the UK's leading compliance and electrical testing specialists, providing customer focused service that ensures peace of mind through surety of compliance.

We have extensive experience across a variety of sectors; including:

- Retail
- Corporate
- Industrial
- Petrochemical
- Healthcare
- Secure environments.

In partnership with our customers, we are committed to providing value for money with effective account management and transparent reporting.

With a network of directly employed engineers across UK, supported by our dedicated Supervision and Management Team, we offer a broad range of services to include PAT and fixed wire testing, through to mains analysis and thermographic imaging.

Our Services

VINCI Facilities' POWERTEST services ensure that electrical systems and equipment are safe and compliant, mitigating the risks associated with electrical malfunction or failure.

Our POWERTEST customers can be assured that their electrical assets are maintained to the highest regulatory standards. Our workforce conducts compliance testing at over 7,000 properties each year across both the public and private sector; to include Allianz, Cancer Research UK, Canals & Rivers Trust, Currys, London Stadium, McDonalds, Siemens and Smyths Toys.

Fixed Wire Testing: POWERTEST provides comprehensive fixed wire testing to IET Wiring Regulations BS7671:2018 amendment 2, along with Electrical Installation Condition Reports (EICR). Ensuring engineers make efforts to trace and identify circuits minimises the number of limitations on certification and provides the assurance required.

In-service Inspection & Testing of Electrical Equipment: Conducting routine 'Portable Appliance Testing' (PAT) by checking electrical appliances for safety through a series of visual inspections and electronic tests, will ensure our clients equipment and premises are compliant and safe.

Emergency Light Testing: POWERTEST's full system inspection and duration test for emergency lighting enables clients to comply with BS5266 regulations and ensures a safe illuminated path out of a building via battery powered lighting during the event of a mains electrical failure.

Thermographic Imaging: POWERTEST are able to carry out thermographic surveys as a standalone service or at the same time as an EICR, providing compliance with legislation, identification of faults and a comprehensive view of the installation's condition.

Our Services

Mains Power Analysis: Through the rigorous measurement of a property/estate's power supply (e.g. voltage, current, phase balancing, etc.), POWERTEST will create comprehensive reports detailing observations and recommendations.

Electric Vehicle Charging Maintenance: Working alongside the wider group, POWERTEST can provide installation and maintenance of EV infrastructures, ensuring safe and functional charging facilities.

Installation and Repairs: In the event of a failed compliance inspection, POWERTEST can provide installation and remedial works, often in occupied buildings, to rectify the issue(s).

Electrical Competence Assessment: As part of our internal competence verification process, our Qualifying Supervisor (QS) will assess both electrical and non-electrical personnel to demonstrate their electrical competency should they not possess an ECS Card (Electrotechnical Certification Scheme).

This assessment includes safe isolation process, minor works certification, and an exam to grade their level of electrical competency. Electrical competency assessments can be requested via VINCI Academy <https://live.hornbill.com/vinci/internal/home/>
